MD #1 (Mental Self Defense Technique)

Password Drill

If someone you are not **absolutely** sure that your parents would want you to go with tells you that they are supposed to give you a ride somewhere. It might be a trick.

- Stay back and ask them if they know the password
- If they don't know, **run to safety**
- If they do know and you feel safe with that person, check with the Adult in charge first

Adult Students: The Mental Self Defense Technique this month is designed with kids in mind. If you attend any of the Combination classes, you may have to participate with them in the learning process or we may use you in a supportive role. This will not be taught in our Adult only class.
